

### **Note to A Grammar of Praxis (2019)**

This paper is an expression of “work in progress” as part of a project with Asger Törnquist at Department of Mathematical Sciences, University of Copenhagen. Footnote 2 in the paper, referring to Törnquist (2019), reflects the status of the project at the time of publication. Further investigations will lead to some corrections of the proof reported, but presumably not of the general conclusion.
